

[1958]

NEW PLANT ORIGINATIONS

From the University of New Hampshire by the Dr. Yeager Team

NEW HAMPSHIRE - A new Red Raspberry originated by Dr. Yeager. A mid-season bearer with large berries of excellent flavor; easy to pick; do not crumble; berries stay whole in pies or jars; long picking season, almost to fruiting of the fall bearers. The canes are large, tall, vigorous and quite branching. These fine features might well be enough for a great new variety, yet more unusual still, it is extremely winter hardy, going through winters here with no killing, when some varieties kill back to the ground. In North Dakota it has been hardy at 35° below. It is healthy and produces prolifically. In Elwyn Meader's garden at Rochester, N. H., a 50 ft. row bore 179 pints. Plants 1 to 10 \$.65 each; 11 to 50 \$.55 each; 51 to 300 \$.50 each; 301 to 500 \$.45 each; 1000 or more \$.40 each; postpaid.

SUCCESS - a new Purple Raspberry originated by Dr. Yeager. Probably the finest flavored purple raspberry in existence. (For a new flavor experience try it in shortcake - delicious!). Apparently disease free, it is the largest and strongest grower I have ever planted. It fruits abundantly. Eleven plants, transplanted to open fields in N.H. in 1954, produced 120 quarts of berries in 1956. One bush here, in 1957, yielded one quart of berries on the first picking alone. Last year we did not have enough plants to fill all orders. This year, while they last, plants \$1.00 each, postpaid.

STRAFFORD STRAWBERRY - the King of the late ones. Giant plants; large berries which hold up in size well into the season. Nice color, good strawberry aroma and flavor. It should have, for both Fairfax and Tupper are grandparents. Firm shipper, Strafford is the only very-late variety that ever gave me a heavy crop of berries.

BLAZE - large, upright plants; a large, bright colored berry somewhat rounded on end, no green tips; uniform color all over; medium late to late; will yield with Strafford, but not as late. Some cataloguers think this may be the late strawberry that many growers have been looking for, to fruit after Catskill. Blaze makes a beautiful pack and has brought a premium price on the Boston market.

PHELPS - produces berries medium in size but high in quality. Extra sweet; flavor is tops; early; good shipper; The crop will be out of the way before Strafford begins.

The prices on the above three N.H. Strawberry varieties are: \$.15 each plus \$.25 postage on 1 to 19 plants; 20 to 49 plants are \$.15 each; 50 to 250 are \$.10 each; in lots of 500, \$40.00; 1000 plants, \$75.00, postpaid.

No guarantee that plants will live. I will ship healthy, freshly dug, well packed plants.
